

Design And Build

Four Build specialize in delivering innovative and tailored design and build services. There are various project delivery methods, in our experience our clients prefer our Design and Build procurement route.

With a commitment to excellence, our experienced team is dedicated to exceeding your expectations.

What is Design and Build?

Design and Build is an integrated approach where the design and construction phases are seamlessly merged into a single process and delivered by a contractor who is responsible for both the design and construction of your project. This provides for collaboration, efficiency, and streamlined communication, ensuring a smoother and more cost-effective project delivery.

Our Capabilities

We approach all projects as a partnership, providing a providing a single point of contact throughout the project delivery. We are large enough to service and deliver most projects. With an emphasis and focus on delivering your vision on time, within budget, and to the highest quality finish.

With a history of delivering complex projects, our team challenges traditional thinking. We consistently push for smarter, more efficient, and more affordable ways to deliver quality construction faster, while always working with integrity to uphold our ethical and environmental standards across all of our projects.

Our Approach

Our approach integrates our experience and expertise as a developer, contractor and consultant which provides our clients with an unrivalled service.

As construction professionals and design specialists we get to the root of your project requirements from the outset to help understand project deliverables that reflect both current and long-term requirements.

Client-Centric Focus

Your requirements are our priority. We work closely with you to understand your project requirements, providing a single point of contact throughout the delivery of your project.

Collaborative Teamwork

Our multidisciplinary team collaborates seamlessly, providing creativity and innovation throughout the entire design and build process.

Transparency and Communication

We believe this is a key requirement in delivering a successful project, to provide transparent and clear communication, keeping you informed at every stage of the project. Our personal approach and clear communication means we mitigate risks as proactive problem solvers.

The Process

Initial Consultation

We begin by understanding your project and building requirements in detail, ensuring a solid foundation for the entire process.

Design Development

Our expert design team bring your ideas to life, creating detailed plans and visuals that align with your vision.

Construction and Project Management

With a skilled construction team and effective project management, we turn the project designs into reality, maintaining the highest standards of quality and efficiency.

Final Inspection and Handover

Before we hand over the completed project, we conduct a thorough inspection to ensure every detail meets our standards and your expectations.
